

## CARE AND MAINTENANCE OF ALUMINUM DOOR & WINDOW FRAMES

Alpha Aluminum frames do not require any mechanical maintenance to ensure trouble free performance

The only care required is in maintaining the appearance of the finish. Exposed surfaces should be kept clean by first removing any dirt or dust with a soft cloth or feather duster, taking care not to apply too much pressure and scratch the finish, then cleaning with a non-corrosive, non-abrasive cleaner, such as liquid soap and water, or Simple Green
